

## MT2\_12

### Technical description:

Modular system in extruded aluminum for recessed installation only on totally disappearing plasterboard. The polycarbonate diffuser is flush with the lower edge (not retracted) with emission not exceeding 120 °. The system is wired with 24V LED strips where the power supply is remote and the polycarbonate diffuser covers the entire length of the profile, creating a continuous line of light.

### Installation:

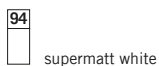

Recessed and totally hidden in plasterboard.

### Dimension:

MT2\_12

P = 106mm P1= 12 mm H = 16mm

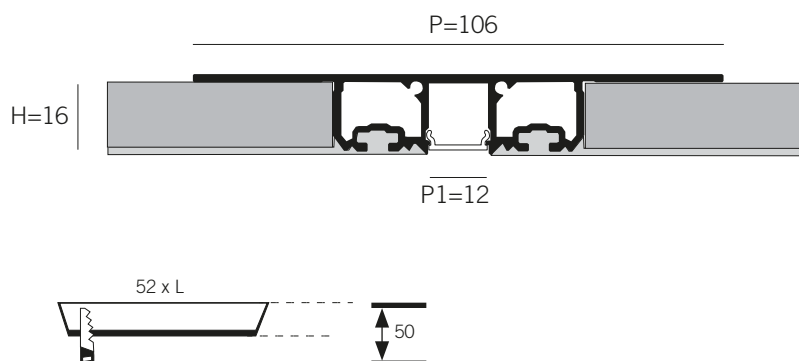

### Finishes:

MT2\_12
