### ME\_648

#### Technical description:

Extruded aluminum system with internal 48V electric track.  
Designed to be installed as a fully retracted recessed installation on plasterboard only. It can be used in the necessary length by simply cutting the profile according to the desired size. Equipped with a magnetic installation system for lighting fixtures. The accessories allow the union and arrangement of the system as needed. The 48V driver to be installed remotely to power the track.

#### Installation:

Recessed on plasterboard.
