

ML_12

Technical description

Extruded aluminum modular system with epoxy powder coating for super matt white finishing. Designed for installation in a structural way in the intersections between the wall and ceiling. Especially suitable for creating luminous beams along the walls or in general on the corner. To be installed only on plasterboard thickness 12.5mm.

The polycarbonate diffuser is recessed with a 120° beam emission.

The system can be wired with 24V LED strips, the power supply is remotely located and the diffuser covers the entire length of the profile creating a continuous light line.

Installation:

Full recessed on plasterboard th. 12.5mm.

Dimensions:

ML_12	P1 = 12mm	P2 = 16mm	P3= 48 mm
	H1 = 58mm	H2 = 45mm	H3= 30 mm

Finishing:

ML_12

Cut to measure with project drawing.
