

ML_45

Description technique

Extruded aluminum modular system with epoxy powder coating for super matt white finishing. Designed for installation in a structural way in the intersections between the wall and ceiling. Especially suitable for creating luminous beams along the walls or in general on the corner. To be installed only on plasterboard thickness 12.5mm.

The polycarbonate diffuser is recessed with a 120° beam emission.

The system can be wired with 24V LED strips, the power supply is remotely located and the diffuser covers the entire length of the profile creating a continuous light line.

Installation:

Plein encastré sur plaque de plâtre th. 12.5mm.

Dimensions:

ML_45	P1 = 44mm	P2 = 58mm	P3 = 88 mm
	H1 = 29mm	H2 = 53mm	

Couleur:

94	blanc super opaque
	white ultramatte
