

MT1_27

Technical description

Modular system made of extruded aluminium epoxy powder painted in ultramatt white, matt black and anodized alluminum finishings.

Suitable for ceiling and/or surface mounted installation.

The polycarbonate diffuser is at lower edge (non-retracted) that confers a not more than 120° beam emission .

The system can be wired with LED strips 24V, where the driver is remote positioned and the methacrylate diffuser covers all the profile length, creating a continuous lighting effect.

Installation:

Suspended and/or surface mounted.

Dimensions:

MT1_27

P = 27.5mm H = 27.5mm

Finishings:

94 white ultramatte

92 black ultramatte

98 anodized alluminum
